

What is actually driving our growth?

Growth by year: videos published, total views and views per video

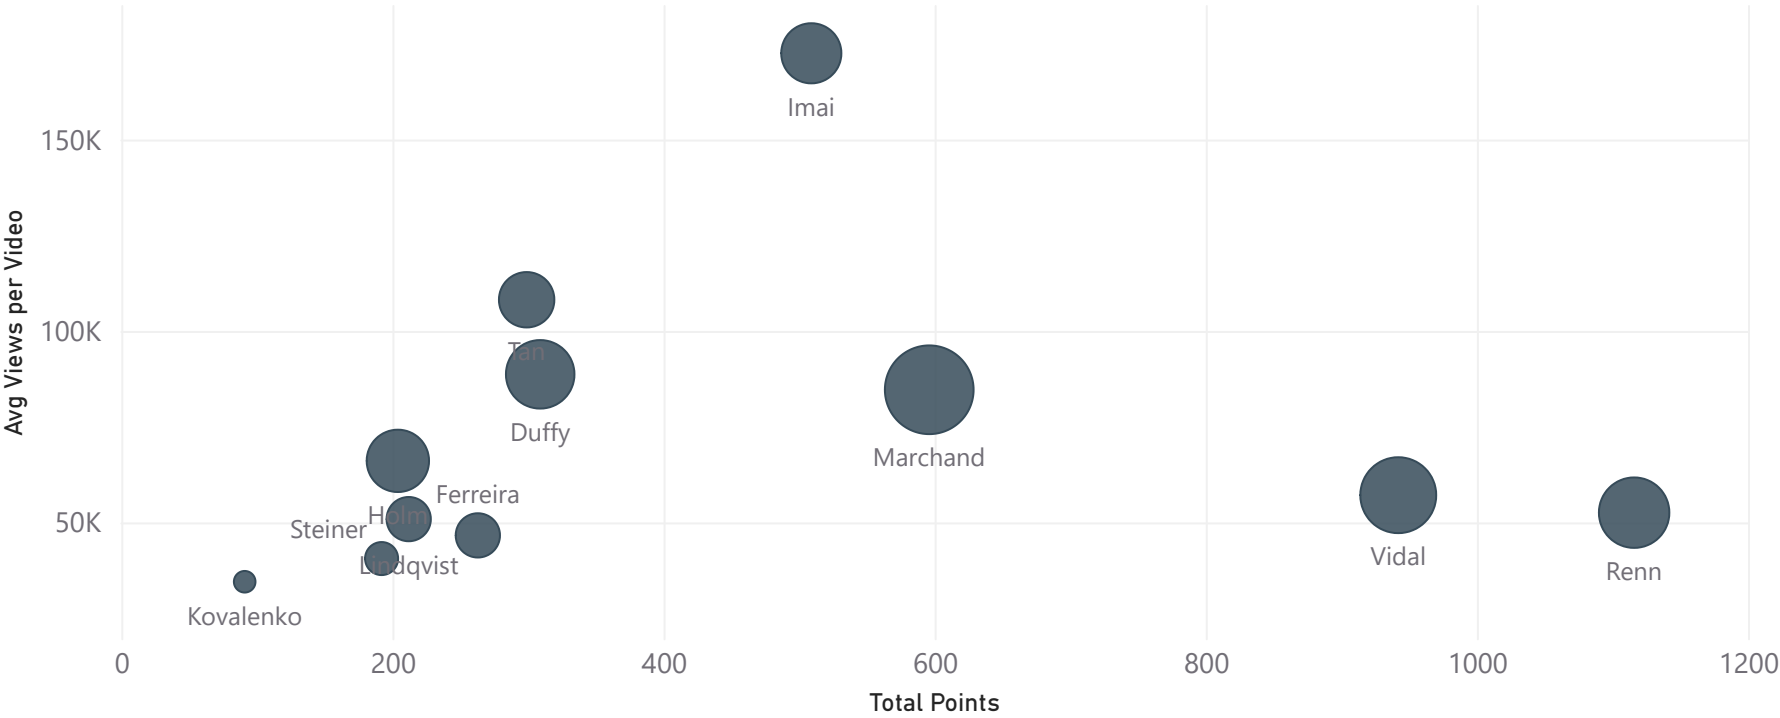

Year	Videos published	Total views	Views per video
2023	102	4,039,730	39,605
2024	94	7,473,745	79,508
2025	109	13,351,216	128,377

Views per video by content type, by year

Results vs audience demand: points and average views per video

Total Points, Avg Views per Video and Focus Video Count by Driver Surname

What is driving our growth

Not publishing more, but each video is being watched more. There were 102 videos published in 2023 and 109 in 2025, but views per video rose from about 40k to 128k.

- **Every content type grew.** All five roughly tripled their views per video, so no single show carries the channel.
- **Race recaps are the strongest.** About 218k views per recap in 2025 against 129k for a driver story, and they have led every year.
- **Points don't buy views.** Renn has the most points of anyone (1,116), yet he and Vidal average about 55k views a video. Imai, on under half of Renn's points, averages about 170k.

Where we would double down in 2026

- 1. Keep every race recap.** It is the most reliable format, so protect the edit time.
- 2. Give driver-story slots to rising drivers like Imai,** ahead of routine profiles of the points leaders.
- 3. Try one video each on high scorers that were never featured:** Okereke, Cavallaro and Berg.

Who gets our videos, and who do viewers actually watch?

Coverage vs results: videos, rank and average views by driver

Driver Surname	Total Points	Points Rank	Focus Video Count	Video Rank	Exposure gap	Avg views per video
Okereke	280	7		12	5	
Berg	271	8		12	4	
Cavallaro	271	8		12	4	
Imai	509	4	12	6	2	172,522
Renn	1116	1	17	3	2	52,558
Tan	299	6	10	7	1	108,158
Vidal	942	2	20	2	0	57,122
Duffy	309	5	16	4	-1	88,686
Ferreira	263	10	6	8	-2	46,623
Marchand	596	3	28	1	-2	84,651
Solano	184	14		12	-2	
Lindqvist	212	11	6	8	-3	50,872
Morales	155	15		12	-3	
Steiner	192	13	3	10	-3	40,571
Havel	154	16		12	-4	
Ashworth	146	17		12	-5	
Osei	109	18		12	-6	
Holm	204	12	13	5	-7	66,086
Roux	96	19		12	-7	
Vasilev	93	20		12	-8	
Kovalenko	91	21	1	11	-10	34,516
Park	80	22		12	-10	
Nakagawa	71	23		12	-11	
Gray	51	24		12	-12	

Is our coverage in step with what viewers watch?

How to read the table. Points rank is the standings position. Video rank is the position by number of videos. A positive exposure gap means fewer videos than results suggest.

What stands out

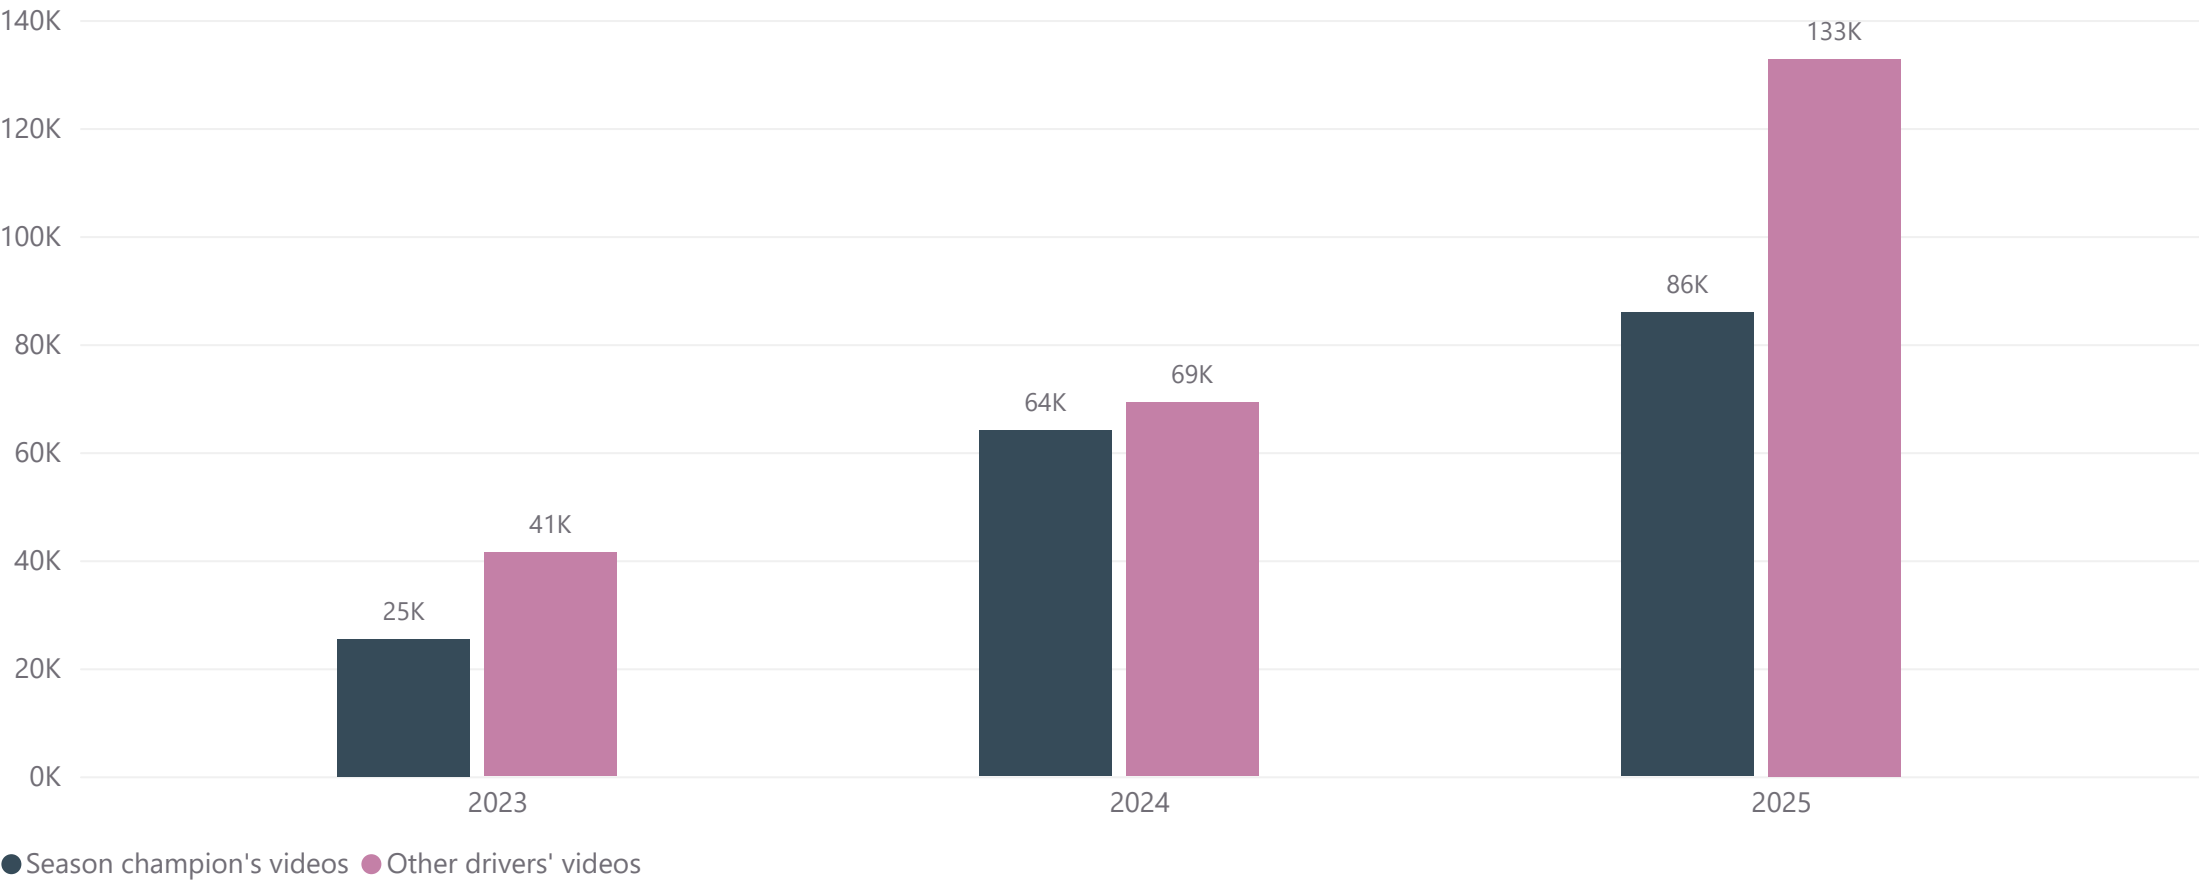

- **Imai is the breakout.** His 12 videos, all from 2025, average 172k views; other drivers' videos that year averaged 113k. Those 12 made up a third of all driver-story views in 2025.
- **Marchand is our volume anchor.** 28 videos, the most, at about 85k each. Solid, not spectacular.
- **Renn and Vidal get plenty of videos but fewer views.** 17 and 20 videos, averaging about 53k and 57k, well behind Imai, Tan, Duffy and Marchand.
- **Three top-10 scorers have never had a video:** Okereke (7th in points), Berg and Cavallaro (joint 8th).

What we would do in 2026

- 1. Make Imai the lead storyline,** with a regular monthly slot.
- 2. Test the unfeatured cheaply.** One video each for Okereke, Berg and Cavallaro. Carry on only if a video gets close to 113k, what other featured drivers' videos averaged in 2025.
- 3. Keep Marchand steady and make Renn and Vidal event-driven.** Use them for big wins and title moments, not routine 'story so far' updates.

Should we invest in a dedicated champion series?

Champion vs other drivers: average views per driver video, by year

Our answer: not yet. Pilot it first.

What the numbers say

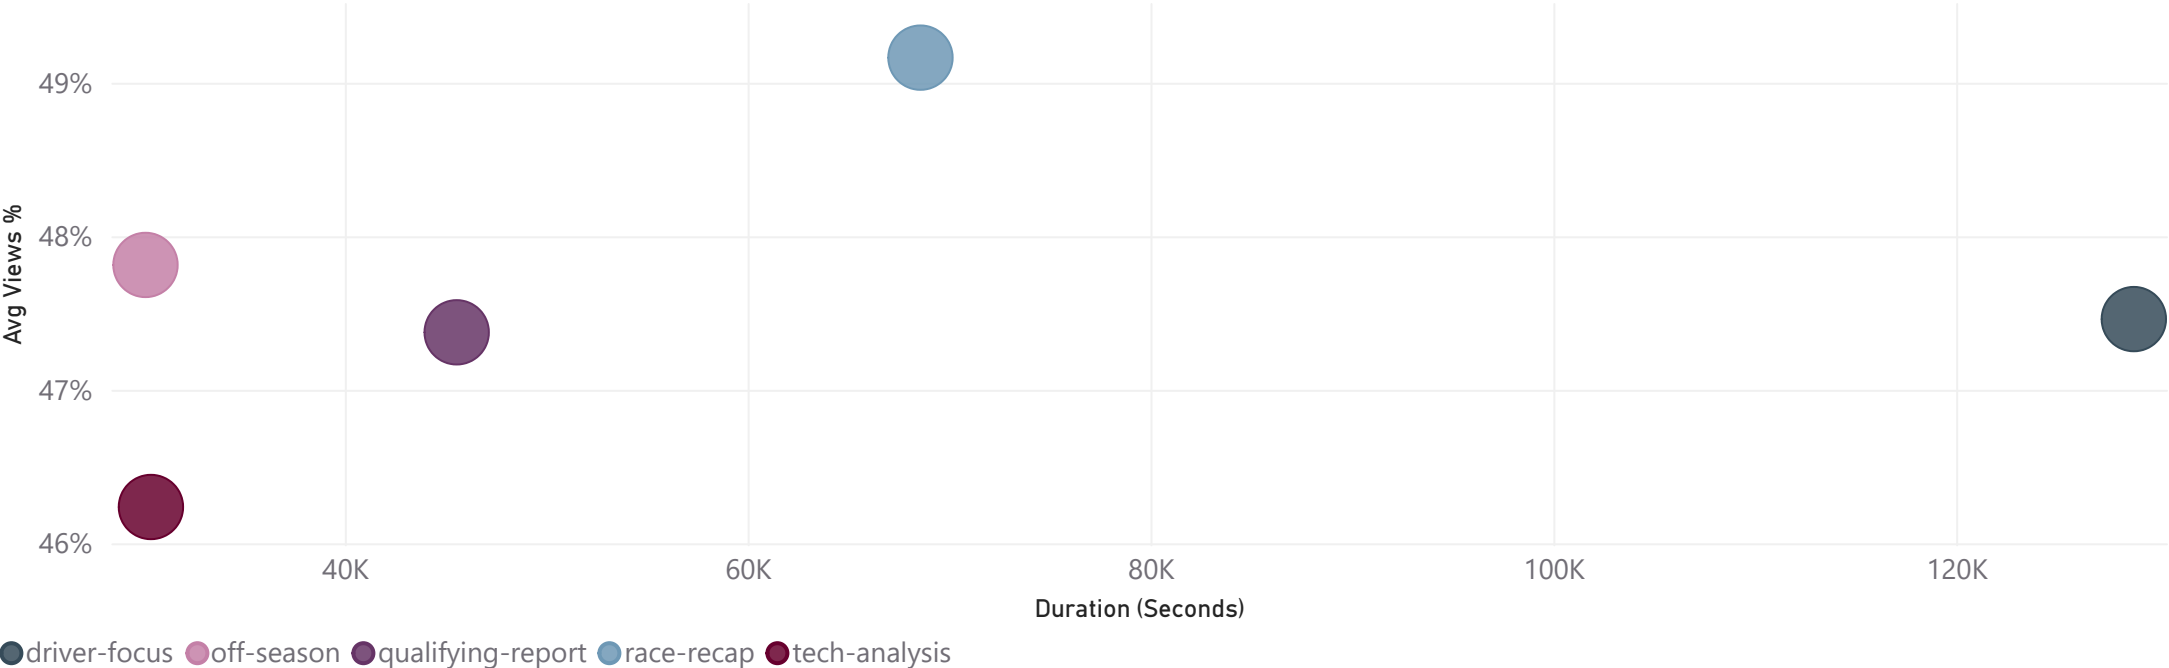

- **Champion stories don't out-pull the rest.** Kasper Renn won the title in all three seasons, but his driver videos got fewer views than other drivers' videos every year: 25k against 41k in 2023, 64k against 69k in 2024 and 86k against 133k in 2025.
- **Video length isn't the lever either.** Viewers watch about 48% of a video whether it runs 10 minutes or 30.

What we would do

1. **Don't commit to a full champion series for 2026.**
2. **Pilot a three-episode mini-series on the title fight,** Renn against Imai. Scale up only if episodes average 130k views or more, about what a driver video got in 2025.

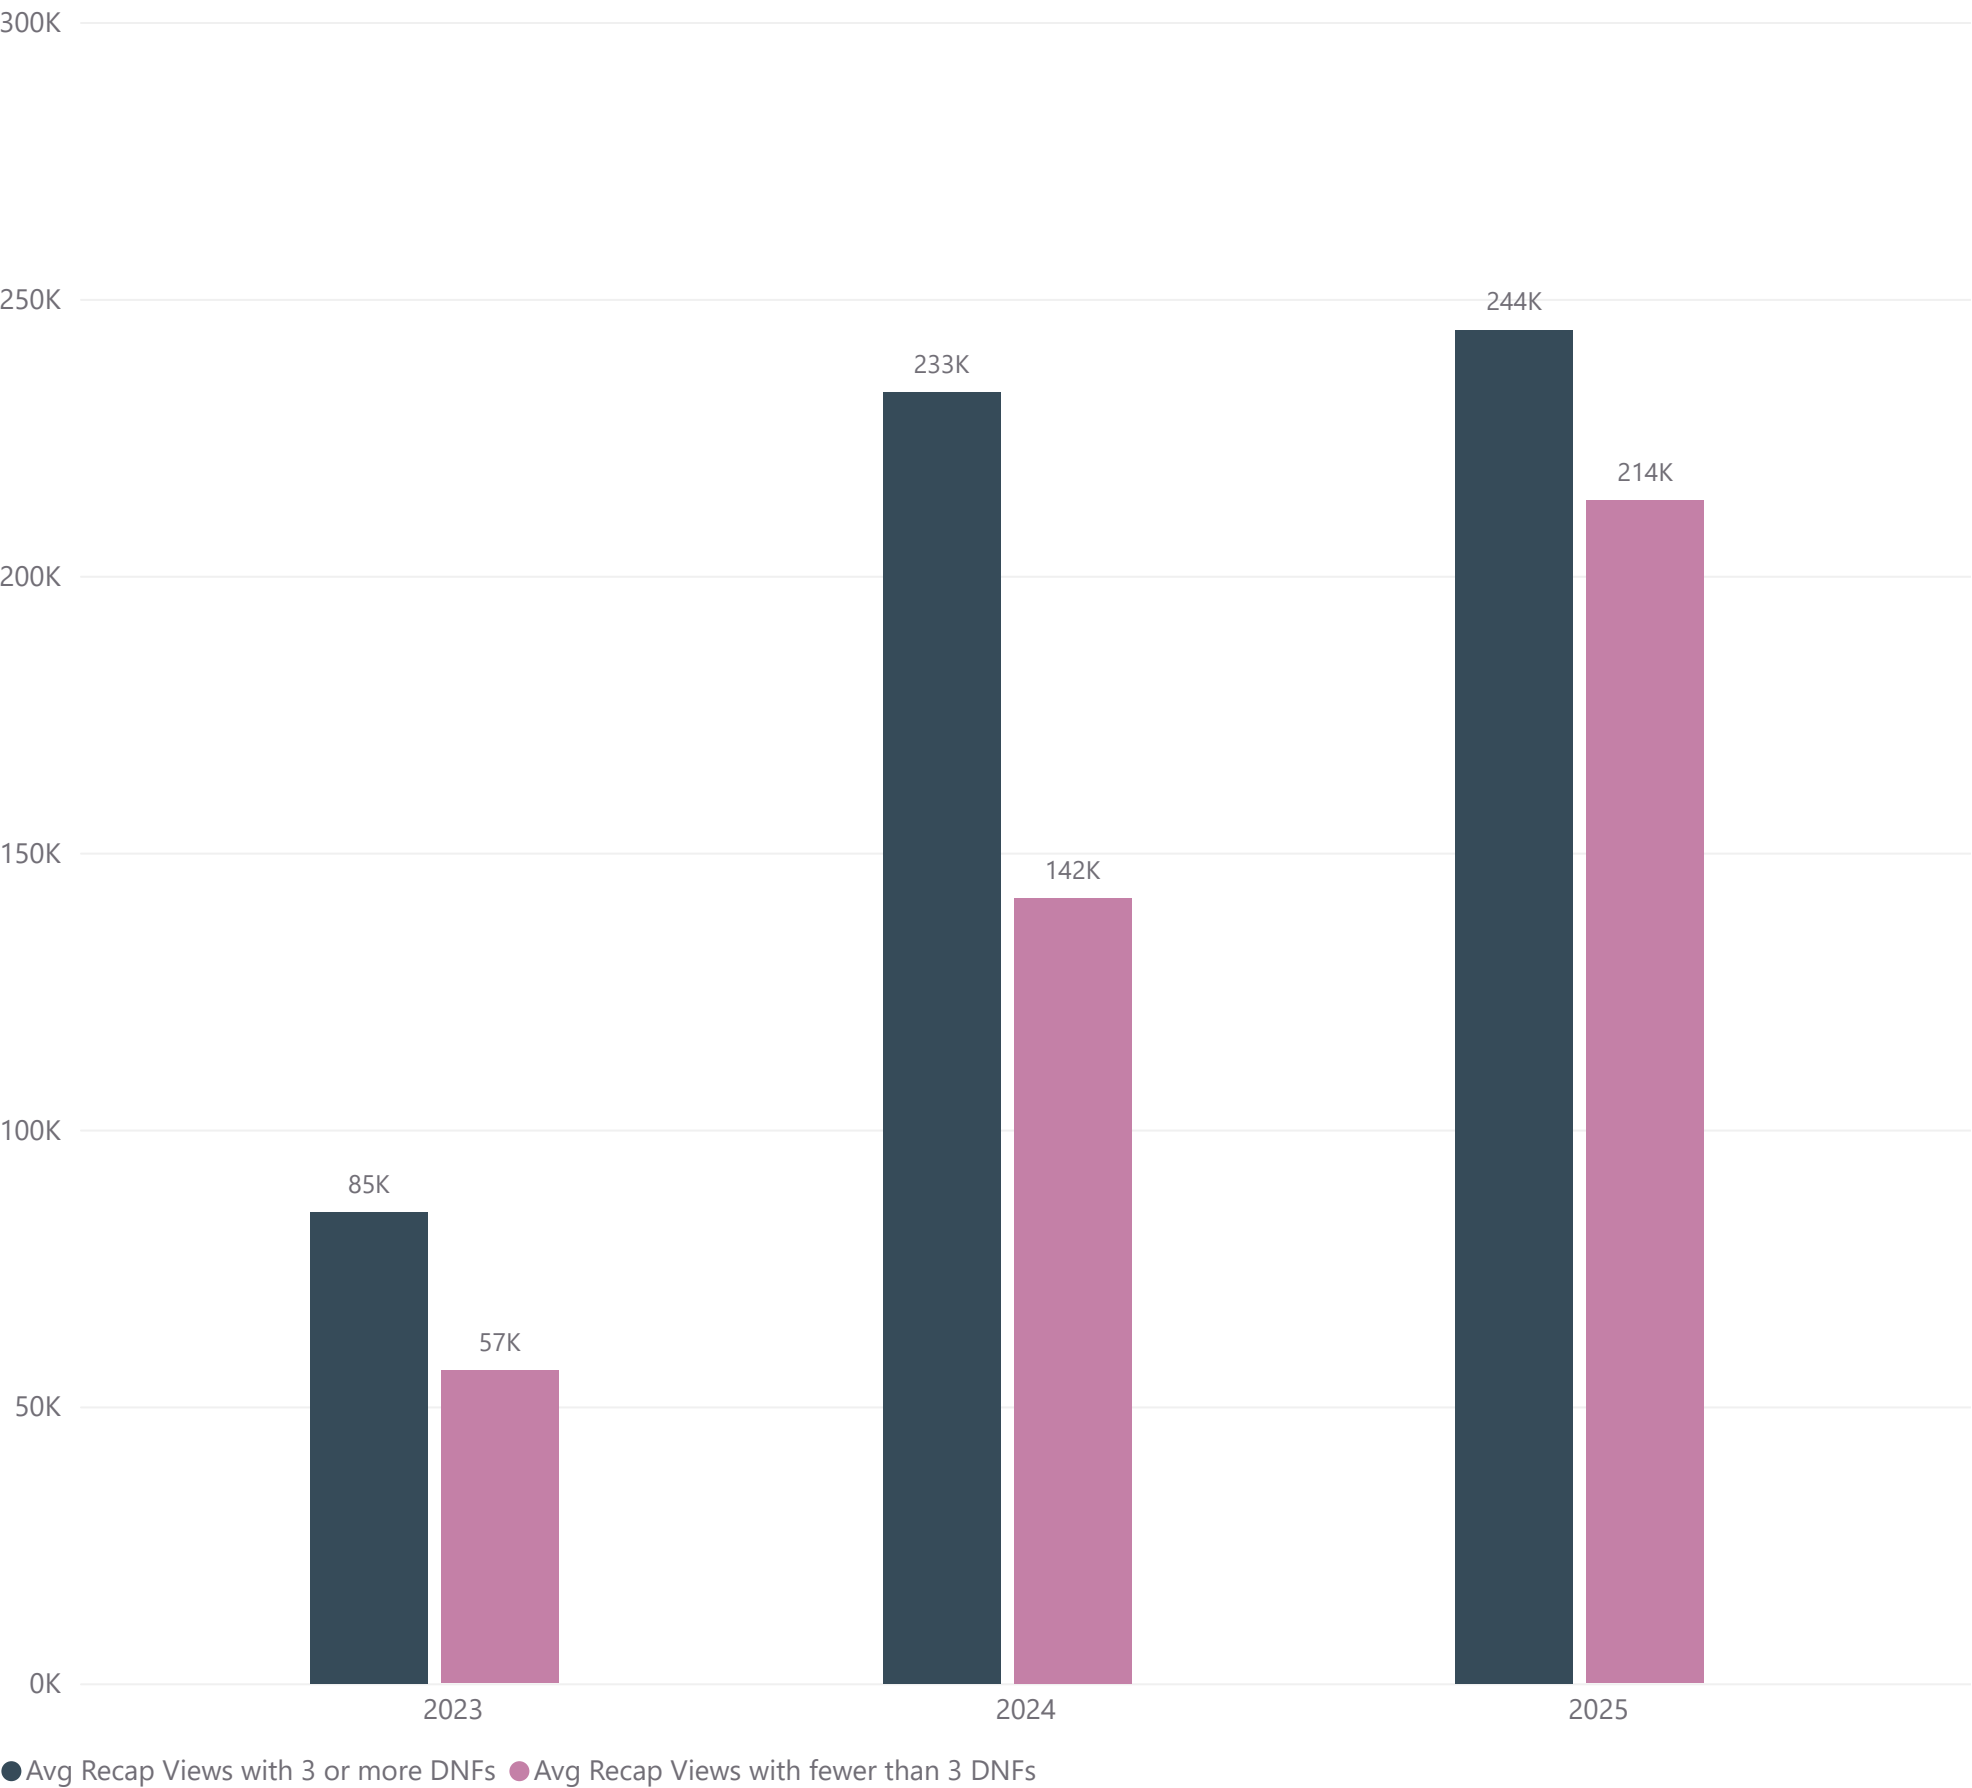

Audience retention vs video length, by content type

Duration (Seconds) and Avg Views % by Category

Race recaps: our most reliable format, and what lifts them

Average recap views by season: races with 3 or more DNFs vs the rest

Chaos sells: what lifts race recap views

- **Retirements lift recaps.** In every season, recaps of races with three or more retirements got more views than the rest: 85k against 57k in 2023, 233k against 142k in 2024 and 244k against 214k in 2025.
- **Why compare within a season.** Recap audiences roughly tripled between 2023 and 2025, so a quiet 2025 race can beat a chaotic 2023 one.
- **Handle with care.** Only 8 of 66 races had three or more retirements (4, 1 and 3 across the seasons), so 2024 rests on a single race. Treat this as a strong lead to test, not a rule.

What we would do

- 1. Triage on race day.** When a race ends with three or more retirements, fast-track a longer recap and give it first call on edit time.
- 2. Pre-build a 'chaos recap' template** (retirement timeline, who lost points, what it does to the title race) so it can go out within hours.
- 3. Keep the speed.** Publish every recap within 48 hours, as we have since 2024.

Pitching sponsors for 2026: what can we prove about our audience?

Views by month

The 2026 sponsor story: a growing, broad, engaged audience

What we can prove

- **Growth.** 13.4M views in 2025, up 79% on 7.5M in 2024, which was up 85% on 4.0M in 2023. Every month from January to November 2025 beat the same month in 2024.
- **Breadth.** Every content type roughly tripled its views per video between 2023 and 2025, so a sponsor isn't betting on one show.
- **Engaged, not just big.** About 4.4 likes and comments for every 100 views in every year, while views tripled. Viewers watch about 48% of the average video.
- **Where the biggest audiences are.** Our ten most-watched videos are nine race recaps and one Imai story.

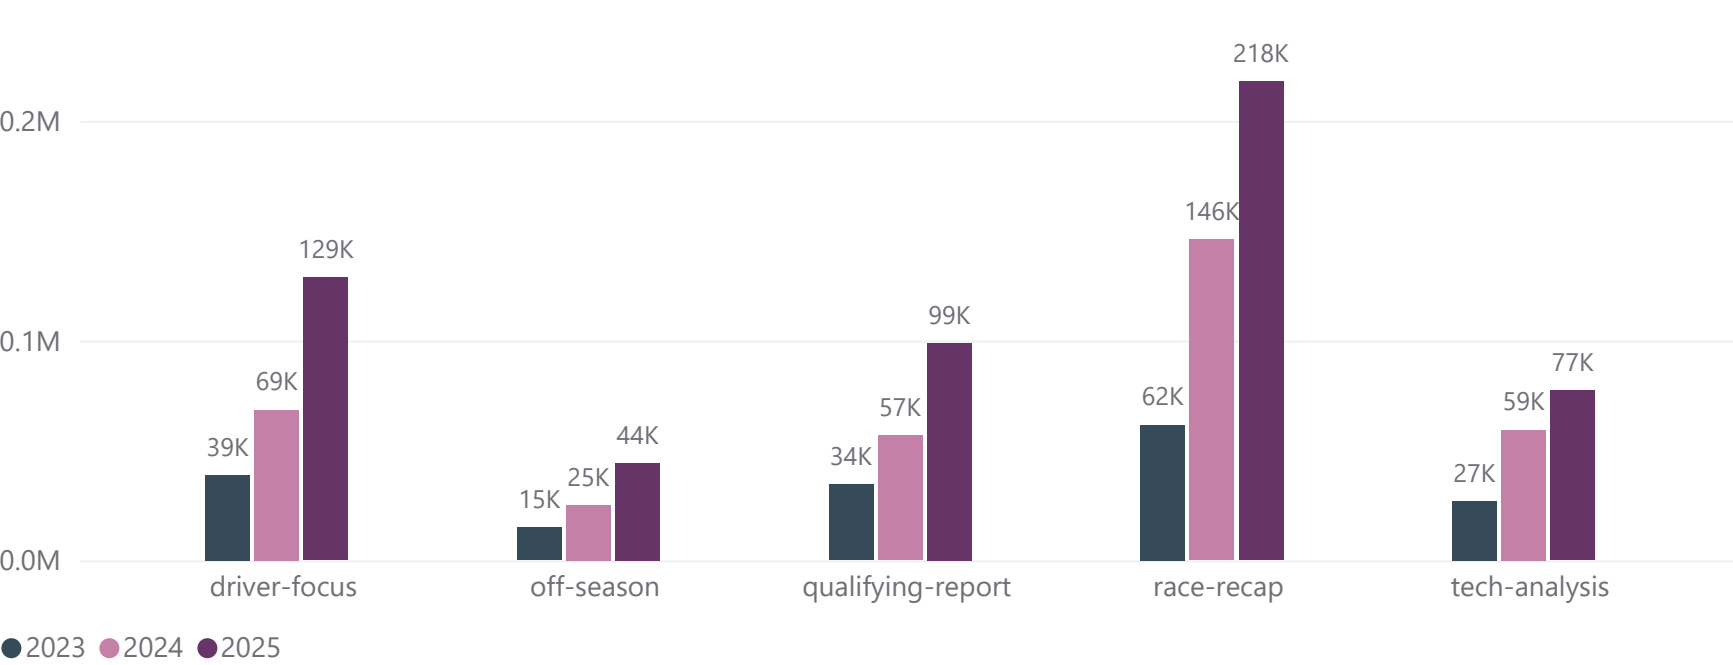

How to use it in the pitch

1. **Lead with the growth:** the views-by-month line and the +79% year on year.
2. **Sell by format:** a Race Recap presenting partner, a Qualifying Report partner and a Driver Story partner (Imai is the obvious fit).
3. **Close the evidence gap first.** Our data only covers views, likes and comments. Sponsors will ask who watches (age, country, subscribers), so pull that from YouTube Analytics.
4. **Quote 2025 as of 11 December** and refresh with the full year before anything goes out.

Scorecard by year: audience size, engagement and watch time

Year	Videos published	Total views	Views per video	Engagement rate	Share of video watched
2023	102	4,039,730	39,605	4.4%	47.63%
2024	94	7,473,745	79,508	4.5%	47.58%
2025	109	13,351,216	128,377	4.4%	47.95%

Team scorecard: points, retirement rate and driver-video appearances

teamName	engineSupplier	Total Points	DNF Rate	Team Video Appearances
Meridian Racing	Meridian Power	2058	9.09%	37
Voltaire GP	Voltaire	1309	7.52%	53
Aurora Autosport	Kobayashi	585	7.58%	6
Halcyon Racing	Meridian Power	580	11.36%	16
Sable Racing	Kobayashi	534	9.09%	6
Redline Dynamics	Titan	445	3.76%	10
Concordia Motorsport	Titan	384	6.82%	1
Ironwood Racing	Meridian Power	347	9.02%	3
Polaris Racing	Voltaire	234	9.85%	
Tempest Motorsport	Titan	218	3.79%	
Total		6694	7.79%	

Engine suppliers: share of points vs share of driver-story views

Where sponsor attention sits today

Shares are of driver-story views, by the featured driver's engine supplier.

- **Attention doesn't match results.** Voltaire-powered teams get half of all driver-story views on 23% of the points. Meridian-powered teams score 45% of the points but get 34% of the views.
- **Titan and Kobayashi teams are under-featured.** Each scores about 16% to 17% of the points, but gets 10% and 6% of the views.
- **Blind spots.** Polaris Racing and Tempest Motorsport have never appeared in a driver story. Ironwood has appeared 3 times and Concordia once.
- **Reliability.** Redline Dynamics and Tempest retire least (about 4% of starts) and Halcyon most (11%).

Recommended sponsor packages for 2026

- 1. Premium tier: Meridian Racing and Voltaire GP.** The two highest-scoring teams (2,058 and 1,309 points) and the two most featured (37 and 53 videos).
- 2. Guaranteed-exposure tier: Titan and Kobayashi teams, and Ironwood.** Offer a committed minimum of featured videos per season, because they are featured less than their results deserve.
- 3. Polaris and Tempest: nothing to sell yet.** Feature a driver from each before pitching their sponsors.
